HOW TO FIND THE MACHINE(S) YOU NEED

1 – 2 – 3 PAPER, SPEED, COLOR list

EXAMPLE: Your office uses 1 to 2 cases of copy paper every month. You want a color machine this time, and speed has to be more than 35 pages per minute.

1. Find the gray block that includes YOUR paper usage.
2. Look straight below "your" block (below a dark red title bar)
3. Kyocera-Copystar shows FOUR color machines that are "A4" size, and SIX machines that are "A3" size.
4. Machines are faster and heavier-duty as you go down the chart. If you never use 11 x 17 paper (A3), you will want to look at the A4 models. The fastest A4 COLOR machine is the "CS-406ci." It does 42 pages per minute.
5. Now look to the right-hand column for that machine's "Ref #." This one is "13."
6. In the "Blue List," find that SAME NUMBER, 13. Click on it and your brochure will pop up for you to read, print or download!

(40) CS-P8060cdn

Once you have found one machine you'll be able to check out other models quickly. For another example, if your office needs to move up to larger paper sizes for advertising and promotional purposes (including giant 12" by 48" color banners), you will want an "A3" size machine. Since you want speeds of 40 pages per minute or so, you would look at the SIXTH blue graph in the COLOR machine section, see that its Ref # is "47," and click on that brochure in the Blue List.

If you prefer Konica-Minolta color machines, there's a section for them, too, in a portion of the "Paper, Speed, Color" list that's not reprinted, here. That would mean clicking on Ref # "31" or "48" in the Blue List for those brochures.

Have you ever considered a pre-owned system? Find the best machine for your needs among all these NEW models, and then *Ask the Copier Concierge* for the latest info on comparable, young, used hardware. The values are phenomenal and Copilabs guarantees pre-owned machines up to 5 years, including REPLACEMENT!

Our 45th Year of restoring the joy of copier Ownership!
